

DIAMONDQUEST®

From Top to Bottom We've Got You Covered!

QuestMark Flooring, a division of CentiMark Corporation, is a leading provider of epoxy and polished concrete floor systems to the industrial and commercial markets. We are committed to offering quality workmanship and the best materials available. We are dedicated to serving our customers with a variety of solutions to meet the needs of each flooring customer. Our floor systems and products are supported by our experienced employee installers, project managers, technical representatives and product demonstrators. QuestMark remains at the forefront of modern flooring technologies. We provide a comprehensive Safety & Risk Program that ensures a safe work environment with on-going training, state-of-the-art equipment and knowledgeable personnel.

CentiMark® Corporation is North America's leading commercial and industrial roofing company offering a full complement of roof systems, roof repair services, emergency leak services and Preventative Maintenance programs. We also provide environmentally friendly roof options such as reflective coatings, daylighting, photovoltaic systems and garden roofs. CentiMark customers receive access to on-line roof management applications including photo documentation of completed repairs.

CentiMark has the financial stability of a 5A1 Dun & Bradstreet company and is an employee-owned (ESOP) company - our associates have an investment in our success. We take ownership of every job – that is our Single Source philosophy.

DiamondQuest® Polished Concrete.

It's time to stop over-looking the most abused asset of your facility's interior and give your floor the ability to truly shine.

QuestMark's DiamondQuest System

A revolutionary way of creating a quality sheen and appearance on concrete floor surfaces without the use of coatings. Our extensive experience in polishing concrete floors has made us an industry leader in the retail, industrial and commercial markets.

DiamondQuest is a multi-step process of progressively finer grinding of concrete floor surfaces through the use of high technology equipment and well-trained QuestMark employees. This process turns an ordinary floor surface into one with a quality sheen and the ability to inhibit water and other contaminants from penetrating the surface.

DiamondQuest Benefits

- High quality floor finish with minimal maintenance
- Unlike coatings, system will not peel, flake, mar or discolor
- Immediate use of floor upon completion of area - no waiting for curing of materials
- Allows vapor transmission through slab in areas where hydrostatic pressure is an issue
- Provides for the continued operation of a facility during installation due to a dry, dust controlled process
- Eliminates dusting of concrete floors
